Our Chemical Supply Services

Manufacturing & Supply of Laboratory Chemicals

We provide manufacturing and supply services for laboratory chemicals and chemical materials serving industrial, laboratory, food, pharmaceutical, environmental, and research sectors.

Our services cover a wide range of chemicals used in laboratory testing, quality control, chemical and microbiological analysis, industrial processes, research and development, with the ability to supply products according to the required specifications, concentrations, purity grades, and intended applications.

Main Chemicals We Manufacture & Supply

Acids

- Hydrochloric Acid – HCl
- Sulfuric Acid – H₂SO₄
- Nitric Acid – HNO₃
- Phosphoric Acid – H₃PO₄
- Acetic Acid – CH₃COOH
- Citric Acid
- Oxalic Acid
- Boric Acid
- Hydrofluoric Acid – HF, subject to applicable requirements and regulations

Bases & Alkalis

- Sodium Hydroxide – NaOH
- Potassium Hydroxide – KOH
- Ammonium Hydroxide – NH₄OH
- Sodium Carbonate
- Sodium Bicarbonate
- Potassium Carbonate

Salts & Inorganic Chemicals

- Sodium Chloride
- Potassium Chloride
- Calcium Chloride
- Sodium Sulfate
- Copper Sulfate
- Ferrous Sulfate
- Magnesium Sulfate
- Sodium Nitrate
- Potassium Nitrate
- Calcium Nitrate
- Sodium Phosphates and Phosphate Compounds

Solvents & Alcohols

- Ethanol
- Methanol
- Isopropyl Alcohol – IPA
- Acetone
- Acetonitrile
- Glycerin
- Ethyl Acetate

Reagents & Analytical Chemicals

Product support

- Phenolphthalein
- Methyl Orange
- Methyl Red
- Bromothymol Blue
- EDTA
- Potassium Permanganate
- Sodium Thiosulfate
- Iodine
- Potassium Iodide
- Silver Nitrate
- Ammonium Chloride
- Ammonium Sulfate

Products can be supplied according to required specifications, concentrations, purity grades, packaging sizes, and intended applications.

APPLICATIONS

Sector-Specific Solutions

Food Laboratory Chemicals

- Food analysis reagents and solutions
- Acidity determination reagents
- Protein analysis reagents
- Fat analysis reagents
- Sugar analysis reagents
- Water quality testing reagents
- Microbiological and food testing reagents

Pharmaceutical Laboratory Chemicals

- Chemicals used for analytical testing and quality control
- Buffer solutions
- Standard solutions
- Indicator solutions
- Analytical reagents
- Chemicals used in research and development
- Materials used for analytical method testing and verification

Customized Chemical Solutions

We can provide chemicals in different concentrations, formulations, and packaging sizes according to the intended application, including:

- Standard Solutions
- Buffer Solutions
- Volumetric Solutions
- Chemical Reagents
- Diluted Acids and Bases
- Titration and Analytical Solutions
- Customized Chemical Formulations according to required technical specifications

Industries We Serve

- Chemical Laboratories
- Quality Control Laboratories
- Research & Development Laboratories
- Food & Beverage Industries
- Pharmaceutical Industries
- Chemical Industries
- Oil & Gas Sector
- Water Treatment Facilities
- Environmental Laboratories
- Universities & Research Centers
- Testing & Analysis Laboratories
- Industrial Facilities and Manufacturing Plants

OUR COMMITMENT

Why Choose Our Chemical Supply Services?

Reliable. Flexible. Application-focused.

We focus on providing reliable and flexible chemical solutions tailored to the requirements of each application and industry — from essential laboratory chemicals and analytical reagents to customized solutions and formulations.

We also provide appropriate product information and technical specifications, together with packaging suitable for the nature of each chemical and its intended use, while observing applicable requirements for safe handling, storage, and transportation.

From essential laboratory chemicals to specialized reagents and prepared solutions, we provide your laboratory and facility with reliable chemical supplies from a single source.

IBC

**One source for dependable
chemical supplies.**
